Multifunction Printer

Xerox® ConnectKey® Technology — the nexus of your complete productivity ecosystem

Today's workplace has evolved beyond the ability of any single machine to fulfill productivity needs of the modern, mobile, always connected workforce. It's time to stop thinking about printers as standalone, task-specific workhorses, and start demanding more up-to-date, useful — and usable — solutions.

INTUITIVE USER EXPERIENCE

An entirely new — and yet entirely familiar way to interact that includes a tablet-like experience with gesture-based touchscreen controls and easy customization.

MOBILE AND CLOUD READY

Instant connectivity to cloud and mobile devices right from the user interface, with access to pre-loaded, cloud-hosted services that let you work where, when and how you want.

BENCHMARK SECURITY

Comprehensive multi-level protection for intrusion, device and data, ready to guard against and eliminate emerging threats and meet or exceed regulatory compliance.

ENABLES NEXT GENERATION SERVICES

Work more efficiently and manage resources more effectively. Easy integration of Xerox® Managed Print Services enables remote monitoring of service delivery and consumables, plus remote configuration for even more time savings.

GATEWAY TO NEW POSSIBILITIES

Instantly extend your capabilities with access to the Xerox App Gallery, featuring real-world apps designed to optimize digital workflows. Commission our network of partners to design innovative, business-specific solutions.

Find out more about how you'll work smarter at www.ConnectKey.com.

Intuitive User Experience

Xerox® AltaLink® Multifunction Printers deliver the experience you'd expect from today's technology. With consistency between devices, customization and a tablet-like experience, you'll get work done faster and connect like never before.

- **Consistent Operation Across Products.**

A common look and feel across all our AltaLink® and VersaLink® Devices makes it easy and intuitive for users to go from one Xerox® product to another without additional training.

- **Advanced Copy and Print Features.**

AltaLink® Multifunction Printers greatly simplify everyday office tasks, providing plenty of support for specialized print applications including Annotation, Bates Stamping and ID Card Copy.

- **User Interface Customization.**

Customize the user interface to maximize your productivity. Hide, reveal and reorder apps — and even features within apps — for easy access to the capabilities you use most.

- **1-Touch App.** Simplify and save complicated or multi-step workflows with 1-Touch.

Workflows can be customized for personal or group use. Once created, they will appear on the home screen and function like native device apps and features.

- **Scan To App.** Users can scan a single job and choose multiple destinations such as email, USB, network and SMB share (Windows network locations). This feature can also be used for scanning-based solutions, which expands their usability. This new capability is available from the Scan To app on the home screen.

- **Fleet Orchestrator.** With Fleet Orchestrator, system administrators can easily deploy software upgrades, apply configuration clones and share files through secure peer-to-peer connections between AltaLink® Devices.

- **Single Touch Scanning.** Use the Single Touch Scan feature to create a dedicated, easy-to-locate scan button directly on the color touchscreen interface. Assign the Single Touch Scan button its own scanning workflow for fast document distribution and archiving.

INTRODUCING MOBILE DEVICE-LIKE TOUCHSCREEN SUPERIORITY.

Meet our all-new, 10.1-inch color touchscreen — the user interface that sets a higher standard for customization, ease of use and versatility. By presenting a familiar “mobile” experience — with support for gestural input and task-focused apps that share a common look and feel — fewer steps are needed to complete even the most complex jobs.

A highly intuitive layout guides you through every task from start to finish, with a natural hierarchy placing critical functions near the top of the screen and commonly used options front and center. Don't like where a function or app is located? Customize the layout to make it yours.

This unmatched hardware technology and software helps everyone who interacts with our AltaLink® Multifunction Printers get more work done, faster.

Experience the AltaLink® User Interface at www.xerox.com/AltaLinkUI.

Intuitive User Experience

(CONTINUED)

- **Application Defaults.** Adjust settings for specific applications, such as always printing Microsoft® PowerPoint® files 2-up and in black-and-white.
- **User Permissions.** With User Permissions, you can restrict access to print features by user, group, time of day and application. To limit color printing, you simply select a rule that makes all Microsoft® Outlook® emails automatically print in black-and-white and in duplex mode.
- **Feature Access Control.** This feature allows administrators to control costs by limiting features to certain users and makes it easier for those users to see only the services they use.
- **LDAP Mapping.** LDAP servers display different results depending on how they implement mappings. You can complete simple email address searches with LDAP and Scan to Email jobs. Our full integration is the differentiator. Our LDAP Mapping integrates with the address book, User Permissions and Scan to Home. In addition, this feature automatically suggests contacts by searching the device address book and LDAP as characters are entered.
- **Common Driver Platform.** AltaLink® Multifunction Printers include common print drivers, which feature clear graphical user interfaces that provide for easy, intuitive interaction with the device. The drivers provide immediate desktop access to all Xerox® device output functions, as well as bidirectional information, indicating device and job status, currently loaded paper sizes and types, and installed options, eliminating the need to consult other software for information. Easy-to-understand icons access the most commonly used functions, such as paper selection and document finishing. With the Saved Settings feature, frequently used print job parameters can be stored for reuse.
- **Embedded Web Server with Search.** Built with responsive design architecture, this allows networked users to connect to their multifunction printer via any standard web browser to install print drivers, monitor printer status, view the print job queue, manage settings and properties, search available functions, perform configuration cloning and access troubleshooting and support resources.
- **Rule Based Printing.** With this feature, you can apply rules to printing or other actions, such as setting up all Microsoft® Outlook® emails to automatically print in black-and-white and in duplex mode.
- **Single-Pass Duplex Automatic Document Feeder.** Get even more reliability and longevity with fewer moving parts on our Single-Pass Duplex Automatic Document Feeder.
- **Auto-Color Scanning (ACS).** This feature allows the device controller to check if the document is color or black-and-white, and then adjust accordingly.
- **Unified Address Book.** ConnectKey® Technology enables features like the enhanced address book with favorites, which lets you seamlessly import your existing contacts and roll them out to multiple ConnectKey® Technology-enabled devices.

CUSTOMER REPLACEABLE UNITS

We engineered our AltaLink® Multifunction Printers with a simplified design so you can stay up and running. Easily and quickly replace components, such as the imaging drum or toner cartridge.

Mobile and Cloud Ready

Whether at home, on the road or in the office, your workforce relies on a variety of devices to do their jobs. Xerox® AltaLink® Devices provide easy access from any device with multiple connectivity options and easy setup.

- **Apple® AirPrint®.** With AirPrint, you can print emails, photos and important office documents directly from your favorite Apple devices, including iPhone®, iPad® and your Mac®. Additionally, Mac users can scan via AirPrint. With AirPrint, your iPhone, iPad or Mac automatically locates and connects to the AirPrint-enabled device over your Wi-Fi® and/or Ethernet network. For enhanced security and controllable printing, Apple AirPrint offers accounting support as well as IPP attributes, which enables more complicated finishing options and print settings, such as two-sided printing, page range, quantity and color or black-and-white.
- **Mopria® Print Service.** This allows Android™ device users to easily and wirelessly discover and print to Mopria-certified Xerox® and non-Xerox® printers or multifunction printers without installing drivers or downloading additional apps or software. As a founding member of the Mopria Alliance, Xerox continues to shape innovation in the mobile printing arena and ensures that both our current and future technologies are keeping up with the ever-evolving mobile landscape.
- **Xerox® Mobile Print Solution.** We offer many options that enable secure, accurate printing from most mobile devices to any printer or multifunction printer, regardless of brand, making it easy to print Microsoft® PowerPoint®, Word and other standard files from wireless and mobile devices. Our IT-friendly optional capabilities include PIN code access and multiple mobile operating systems. Whether off-site or on-site, learn why we are the only choice for today's mobile professionals by visiting www.xerox.com/MobileSolutions.
- **Xerox® Workplace Suite** provides on-premises, server-based print management and mobile access for your printer fleet. Ideal for organizations with higher data control requirements, it offers mobile productivity, benchmark security, convenience and usage insights to reduce costs and get more done. Learn more at www.xerox.com/WorkplaceSuite.
- **Xerox® Workplace Cloud** provides secure, convenient, dashboard-based monitoring and control of your entire printer fleet as well as usage insights. It's designed for organizations with limited IT support, companies with multiple networks and those looking to reduce their infrastructure. Learn more at www.xerox.com/WorkplaceCloud.

A basic version, Print@PrintbyXerox, is also available as a free app on your device and allows you to print from the cloud via email.
- **Wi-Fi Network Adapter (Wi-Fi Kit).** With this optional hardware, you can easily set up and place your AltaLink® Multifunction Printer anywhere you need it without costly additional network reconfiguration and wiring.
- **Wi-Fi Direct®.** This ensures that you can print to AltaLink® Multifunction Printers from your mobile device without having to connect to a network. Adding the optional wireless network adapter enables this connection and allows for both an Ethernet connection and Wi-Fi Direct connection to be enabled at the same time.
- **Xerox® Mobile Link App.** This free app allows you to scan, email and fax from your Android or iOS-based mobile device to AltaLink® Multifunction Printers and send data to and print data from cloud storage. Downloaded from the Google Play™ Store or Apple App Store, Mobile Link resides on your mobile device. Once installed, easily create Mobile Link one-touch workflows between a mobile device and an AltaLink® Multifunction Printer. Use a manual address or allow automatic device discovery to find and pair your mobile device with a nearby Xerox® multifunction printer.
- **Xerox® Global Print Driver®.** This truly universal print driver lets IT administrators install, upgrade and manage Xerox® and non-Xerox® devices from a single driver. It provides a consistent, easy-to-use interface for end users, reducing the number of support calls and simplifying print services management.
- **Xerox® Mobile Express Driver®.** This feature makes it easy for mobile users to find, use and manage Xerox® and non-Xerox® devices in every new location. Plug into a new network, and Xerox® Mobile Express Driver® automatically discovers available printers and provides status and capability information. Save a list of "favorite" printers for each location, store application print settings for use on any printer in any network and greatly reduce mobile support calls to IT.

Mobile and Cloud Ready

(CONTINUED)

- **NFC Tap-to-Pair.** With Near Field Communications (NFC) Tap-to-Pair, users can simply tap their Android device to an AltaLink® Multifunction Printer to establish a direct connection. Once established, printing is handled using a wireless connection if the optional wireless network adapter has been installed. If the wireless network adapter is not installed, printing is handled via the Ethernet network. This feature allows for greater security and results in less waste as users are in direct proximity to the device.¹

- **Xerox® Print Service Plug-in for Android™.** This unique, full-featured plug-in for Android devices streamlines mobile printing without third-party apps or additional print drivers. After downloading this free plug-in from the Google Play™ Store, you can easily print photos, web pages and documents when your mobile device is connected to AltaLink® Multifunction Printers using a

wireless network. Robust printing options include color or black-and-white printing, number of copies, paper orientation, two-sided printing, stapling, Secure Print/ Secure Code Release and more.

- **Support for Google Cloud Print™.** Xerox® AltaLink® Multifunction Printers are enabled with secure cloud printing, an ideal solution for workers on the go. Securely and directly connect and register with the Google Cloud Print service and your smartphone, tablet, laptop or traditional desktop device will always be available wherever you are. No need to install and maintain print drivers or additional software.

- **Cloud Connections.** AltaLink® Multifunction Printers provide Connectors for apps, such as Box®, DropBox™, Microsoft® OneDrive® and Google Drive™ online storage service so users can easily print from and scan to the locations they use every day.

- **Xerox® Connect for DocuShare®.** Scan files directly into Xerox® DocuShare® folders from your AltaLink® Multifunction Printer. This workflow solution automatically converts documents into intelligent, structured data with easy file naming and routing tools.

¹ If the wireless network adapter is not present, print jobs submitted from an Android device will route via Ethernet only if the customer has configured their network appropriately.

XEROX® MOBILE LINK APP

Capture It

A scan gets initiated from your mobile device or capture a photo with your mobile device.

Manage It

Merge documents into a single document and add PDF passwords. Camera capture can auto adjust for image skew and parallelism.

Send It

Send to single or multiple destinations, including printers. Create one-touch workflows. Leverage your contacts and cloud logins.

For more information, go to www.xerox.com/MobileLink.

Apple® AirPrint® and Xerox® Print Service Plug-in for Android™ are standard/free-of-charge protocols for Apple iOS, Android and Xerox® ConnectKey® Technology-enabled devices. Xerox® Mobile Print is an add-on software product that allows users to print to Xerox® or non-Xerox® print devices.

Benchmark Security

Single and multifunction printers are now capable of working at the heart of your business operations. With the exponential growth of wireless devices, cloud-hosted software and services, your printer not only needs to work with these new technologies, but also stay secure from them.

HOLISTIC PROTECTION FOR YOUR PRINTER

Xerox offers a comprehensive set of security features to keep your printers and data safe. We secure every part of the data chain, including print, copy, scan, fax, file downloads and system software. There are four key aspects to our multi-layered approach.

Intrusion Prevention

A comprehensive set of capabilities helps you control who can access key printer features. User authentication restricts use to authorized staff. Role-based access control ensures team members only see what they need to. And every action is logged for a full audit trail.

You also get the protection of Xerox® ConnectKey® Technology, which will intercept corrupted files and malicious software before they can impact your device.

Device Detection

In the unlikely event an attack gets through your data and network defenses, an array of built-in security solutions stand at the ready. Firmware verification will alert you to any malicious software. McAfee® Whitelisting technology automatically prevents malware from running. And integration with Cisco® Identity Services Engine (ISE) auto-detects Xerox® devices on the network for security policy implementation.

Document and Data Protection

Our security solutions also protect your printed and scanned documents from unauthorized or accidental disclosure or modification. PIN code and card release systems keep print outputs secure. And digitally signed, encrypted and password-protected files keep scanned information out of the wrong hands. You can also lock email fields to limit scan destinations to internal addresses.

Your stored information also benefits from the highest levels of encryption. And data that is no longer required is deleted using National Institute of Standards and Technology (NIST) and U.S. Department of Defense-approved data clearing and sanitation algorithms.

External Partnerships

Xerox works with compliance testing organizations and security industry leaders such as McAfee and Cisco to wrap their overarching standards and know-how around ours.

For third-party independent proof that we achieve top levels of compliance, certification bodies like Common Criteria (ISO/IEC 15408) and FIPS 140-2 measure our performance against international standards.

They recognize us for our comprehensive approach to printer security.

Intrusion Prevention

Device Detection

Document & Data Protection

External Partnerships

Benchmark Security

(CONTINUED)

Xerox® AltaLink® Devices include the following features, technologies and solutions to ensure your data and network is kept secure.

- **Protect Against Threats.** AltaLink® Multifunction Printers are protected by McAfee's Embedded Control whitelisting technology. McAfee's whitelisting technology ensures only safe, pre-approved files or functions are executed on your devices, minimizing the need to manually update software levels against new security threats. Also, seamless integration with the Xerox® Managed Print Services toolset and McAfee ePolicy (ePO) allows for easy tracking and monitoring.
- **Configuration Watchdog.** Compliance with company security policies is made simple. Administrators can configure and monitor up to 8 security features and automatically reset them if they are changed by a user. Email alerts are generated in case remediation is unsuccessful, and all events are captured in the audit log. 
- **Secure Print With Print Queue Deletion.** With this feature, users are required to enter a passcode at the device to release a job or can delete jobs from their queue. That means fewer documents are unnecessarily printed and left at the device.
- **Hard Disk Encryption.** This feature effectively safeguards your data from unauthorized access while it's being processed, transmitted or stored in the printer or multifunction printer.

- **Protect Your Confidential Information.** Sensitive data is safe with encrypted PDF files for scanning and these devices are compliant with the 256-bit AES FIPS 140-2 standard. Hard drive image overwrite eradicates data stored on the hard disk automatically, at specific intervals or on command, and hard disk encryption safeguards data while it's stored.
- **Protect Your Data.** With Immediate Image Overwrite, our AltaLink® Multifunction Printers can automatically erase image data from the device after each job.
- **Stay Compliant with Regulations.** AltaLink® Devices comply with the latest security standards, including the Federal Information Processing Standard (FIPS) 140-2, Department of Defense (DoD) Security standards and undergo the full-system Common Criteria (undergoing evaluation) certification process. Controls are available to match your security needs and conform to any standards across industries, government, finance and healthcare.
- **Password Protected PDF.** Users have the option to encrypt PDF files with a password when using the Scan to Email service on AltaLink® Multifunction Printers. This technology provides protection outside of your firewall, securing data in an unsecure environment using industry-standard protocols such as Secure PDF.
- **Encryption of the Print Stream (Secure Print only).** Apply document encryption when submitting Secure Print jobs to ConnectKey® Technology-enabled devices. Print driver encryption does not require additional hardware and encryption is applied only when Secure Print is selected.

- **Xerox® Workplace Suite/Cloud.** This is a modular set of workflows designed to save customers time and money by providing effective control over their print fleet, while enabling worker productivity and mobility through a set of robust workflows. Xerox enables ultimate customer flexibility by offering these capabilities in both an on-premises server version and with a cloud-based version of this solution.
- **Audit Logs.** Track access and activity by document, user and function on AltaLink® Multifunction Printers. The Audit Log is disabled by default; it can be enabled and disabled in the Embedded Web Server.
- **Cisco Identity Services Engine.** Xerox® AltaLink® Multifunction Printers are among more than 200 Xerox® devices detail profiled into Cisco's Identity Services Engine (ISE), the networking leader's widely used, enterprise-proven security policy management and enforcement platform. These profiles let ISE automatically detect Xerox® ConnectKey® Technology-enabled VersaLink® and AltaLink® Devices and control access based on granular security policy set by the organization.

Enables Next Generation Services

With Xerox® ConnectKey® Technology, you'll have powerful tools for ultimate control over every Xerox® AltaLink® Multifunction Printer on your network — including the ability to set job limits, monitor usage and perform backup and restoration operations. You'll gain more control over costs, reduce strain on IT resources, and improve overall performance.

- **Common Look and Feel Across Products.** ConnectKey® Technology provides users a consistent experience across all our ConnectKey® Technology-enabled devices, making it easy and intuitive for users to go from one Xerox® product to another without additional training.
- **Energy Management.** With Cisco EnergyWise®, enabled by Xerox® Power MIB (Management Information Base), you can control, manage and report your device's power consumption information, and set optimal power states and timeout intervals.
- **Driver Deployment.** Print and scan drivers can be deployed centrally, eliminating the need for IT staff to perform desk-to-desk manual installation of the driver software. In many cases, existing Xerox® drivers on your network can work with your new hardware, potentially saving the step of updating your driver software. Wizards provided within Xerox® CentreWare® Web aid in installing, troubleshooting and upgrading your driver software, freeing up your IT staff for more pressing projects. The Xerox® Global Print Driver® supports Xerox® and non-Xerox® devices on the network, eliminating the need for other print drivers and saving hours of downtime.
- **Xerox® Device Manager and Xerox® CentreWare® Web Software.** These device management software tools make it easy to install, configure, manage, monitor and pull reports from networked and multifunction printers throughout an enterprise, regardless of the manufacturer.
- **Configure Once, Apply Fleet-wide.** AltaLink® Device configurations can be cloned and distributed to all similar devices on your network, eliminating the need to configure and manage each device individually. Cloning can be completed using several different methods. Users can employ a USB memory drive, they can utilize the Embedded Web Server, or there are a variety of managed print services tools for customers enrolled in a managed service program.
- **Manage, Track and Report Device Usage.** Use Xerox® Standard Accounting tools to control print quantities and chargeback options for print, scan, copy and fax. Advanced solutions from Xerox Business Innovation Partners deliver even more helpful tools for larger office environments.

Gateway to New Possibilities

Multifunction printers built on Xerox® ConnectKey® Technology are more than machines. They are your extremely capable Workplace Assistants.

Right out of the box, they become the centerpiece of a workplace transformation and productivity ecosystem that combines all the technologies, capabilities and extensibility you need to let your work — and work teams — flow.

- **Xerox Extensible Interface Platform®.**

Our AltaLink® Multifunction Printers come equipped with an open platform that is customizable to fit your work environment and needs. This key unlocks your ability to simplify everyday tasks that make the MFP easier to use and allows the MFP to run third-party solutions that enable an even more tailored workflow.

- **Xerox® ConnectKey® Apps and Xerox App Gallery.** With the touch of a button, you can go to our Xerox App Gallery and download these lightweight, serverless apps to your AltaLink® Multifunction Printer to increase user productivity and shorten everyday tasks. ConnectKey® Apps empower you to easily customize your workflow with apps such as @PrintByXerox, Xerox® Easy Translator Service and Xerox® Healthcare MFP¹. Your partner or reseller can build a custom ConnectKey® App for your business if it's needed for a specific workflow.

- **Mobile Apps.** Download our mobile apps to your AltaLink® Multifunction Printers and simplify common tasks and customize your devices. You can download additional apps based on your business needs, or engage our partners to build new business-specific apps to reduce complicated workflows to single-touch simplicity.

- **Xerox® MFP Workflow App**

Customization Service. This extends ConnectKey® Technology capabilities by creating highly targeted workflows that aren't available through off-the-shelf software. The Xerox Solutions team will work with customers to design the exact process workflow needed on ConnectKey® Technology-enabled devices.

- **Xerox® Easy Translator Service.**

This service allows customers to scan a document and receive a translated print of the document or email notification. Users can also send a digital image from a mobile device or a PC that is forwarded for translation. This is offered for both iOS and Android™ devices. For more information, visit www.XeroxTranslates.com.

For more information go to www.xerox.com/AppGallery to learn how you can expand the capabilities of your MFP and work in new ways with dedicated apps for business, education, healthcare and more, such as Forms Manager, Connect to Concur, Remark Test Grading and Share Patient Information.

¹ Xerox® Healthcare MFP is available in the U.S. only.
